CDT Management Picked By Doral Golf Resort & Spa To Create and Manage New Tennis Center

CDT Management, an international tennis consulting, design and management company, has been retained by The Doral Golf Resort & Spa to design and consult in the building and ultimately management of a new tennis facility for this upscale vacation resort property.

The new tennis facility, with 4 hard-tru courts and pro shop, will be located on the resort property.

CDT, which has clients in the New York, Florida and the Caribbean, will use its unique trademarked touches in the design plans for its upscale tennis resorts, such as lush landscaping throughout the tennis property exterior to create natural windscreens and adding to the pleasing aesthetics.

“The Doral Golf Resort & Spa has a tremendous history as a high-end resort with its legendary golf courses and luxury spa program,” said Don Henderson, CEO of CDT Management. “We are pleased that we have been entrusted by Doral to develop and run its new tennis amenity.”

“Tennis is an important offering for our resort and we are excited to have secured the talents of CDT Management,” said Darrin Helfrick, Golf General Manager at Doral. “Both of our companies share the same vision of how we can provide a tennis product that nicely compliments our golf and spa offerings.”

Design work is underway with construction likely to start this spring. Once completed CDT will provide its expert pro staff to manage the tennis center and implement the programming that will include private lessons, clinics, league play and specialty events.
